**TRIMEDYNE'S CHAIRMAN TO BE INTERVIEWED LIVE ON MN1.COM**

March 6, 2007 – Lake Forest, CA: TRIMEDYNE, INC. (OTCBB “TMED”) today announced its chairman, Dr. Marvin P. Loeb, will be interviewed live on Market News First (MN1.com) at 2:30 p.m. Eastern Time on Tuesday, March 6, 2007.

Dr. Loeb will discuss the Company's recently announced, worldwide marketing alliance with Boston Scientific and Lumenis, Ltd., who will distribute Trimedyne's new Side Firing Laser Fiber as an accessory to Lumenis' Holmium Lasers for the treatment of enlarged prostates in men. About 50% of men over age 55 suffer from an enlarged prostate, an estimated \$700 million annual market. Dr. Loeb will also describe the \$600 million potential market for the Company's outpatient laser procedures to treat herniated or ruptured discs in the spine, its four consecutive years of profitability and its current financial condition.

Commenting on the upcoming interview, Dr. Loeb said, “We are pleased that Market News First has chosen to interview us, and we are gratified by the attention being paid to Trimedyne's four years of profitability and the potential for growth due to Trimedyne's new, worldwide marketing alliance with Boston Scientific and Lumenis and Trimedyne's outpatient spinal disc procedures.

**About MN1.com**

Market News First is an online, market news provider that brings investors current news on the market. Market News First is the only online, live radio web site that brings real market news to investors and features live interaction with companies from the Bulletin Board to NYSE.

Through daily, live interviews, MN1 brings investors up-to-date on promising companies and informs investors of the newest opportunities within the market. Market News First offers one-on-one interviews with the presidents and CFOs of companies and provides investors with insight into the companies' present condition and future plans.

## **About Trimedyne, Inc.**

Trimedyne is a leading manufacturer of proprietary medical lasers and patented fiber optic devices for performing a variety of minimally invasive procedures as a less traumatic, lower cost alternative to traditional surgery.
